Exchange Service Softener SM-Model

General Description

The SM-Model Softener is compact and portable.

It is a down-flow design with no moving parts. The tank is constructed of T-304 stainless steel of low carbon content with heli-arc welded top and bottom and fusion seam-welded shell. The top has three openings: one 1 3/4" threaded opening for filling the tanks and one 3/4" threaded nipples in the top of the inlet and outlet tank connectors.

*Stainless Steel distributors (short and long) are available for hot water applications.

Features

- 3/4" flow tank connectors
- Heavy-duty construction
- Stainless steel construction
- "O" ring seals
- High flow rate
- Compact
- Quick disconnect fittings

Plastic distributors can be easily removed from tank to facilitate cleaning
